Easy Cl
Simple and Affordable

Easy Chloride Determination
EasyPlus™ Titrators contain a silver ring electrode and are ready for your chloride determinations by silver nitrate titration. The Easy Cl Titrator meets all your argentometric titration needs.

Easy App Guidance
This titrator has been especially designed for simplicity. New operators are already familiar with the Smartphone like Apps oriented user interface. Start your routine analysis with a LongClick™ on the home screen. The intuitive navigation speaks your language and 14 others. Learning and using a new analytical instrument has never been so easy.

Swiss Engineered
EasyPlus™ Titrators are designed and constructed by our Swiss development team according to the highest possible software and hardware standards. Their renowned expertise has made the impossible possible; to develop such a high quality instrument with such a small footprint.

iTitrate for Easy Programming
iTitrate™ Intelligence makes method programming simple with EasySetup guidance. Set only the minimal parameters and the titrator programs the rest, including correct calculations based on desired measurement units. Easy setup equals swift implementation.

Easy Cl Titrator
The Precipitation Titrator

The Easy Cl Titrator speeds up simple, automated precipitation titrations. This versatile titrator is suitable for a range of determinations making it ideal for simple titrations of most sample types. The simple 'App' style user interface reduces training time while increasing work speed and simplicity. iTitrate™ Intelligence's guided set-up assists in method programming to ensure samples are tested consistently, regardless of operator, and with minimal effort. Eliminate manual calculations and documentation with a printer or EasyDirect™ Titration PC Software.

The silver ring electrode makes this titrator ideal for the following applications and many more:
• Chloride (salt) content of food and beverages.
• Salt content of waste or drinking water.
• Sulfide or mercaptan content of oils and lubricants.
• Silver content of solutions and dissolved metals.
