

Simple and Affordable

One Titrator for Many Needs

This versatile titrator is ready to carry out all your acid/base inflection point, pH endpoint or precipitation/redox indicative titrations. Be prepared for all basic titrations whatever your industry.

Easy App Guidance

This titrator has been especially designed for simplicity. New operators are already familiar with the Smartphone like Apps oriented user interface. Start your routine analysis with a LongClick™ on the home screen. The intuitive navigation speaks your language and 14 others. Learning and using a new analytical instrument has never been so easy.

Swiss Engineered

EasyPlus™ Titrators are designed and constructed by our Swiss development team according to the highest possible software and hardware standards. Their renowned expertise has made the impossible possible; to develop such a high quality instrument with such a small footprint.

iTitrate for Easy Programming

iTitrate Intelligence makes method programming simple with EasySetup guidance. Set only the minimal parameters and the titrator programs the rest, including correct calculations based on desired measurement units. Easy setup equals swift implementation.

Easy Pro Titrator

The all in one Titrator

This versatile titrator is suitable for a range of determinations making it ideal for simple titrations of most sample types. The simple 'App' style user interface reduces training time while increasing work speed and simplicity. iTitrate Intelligence's guided set-up assists in method programming to ensure samples are tested consistently, regardless of operator, and with minimal effort. Eliminate manual calculations and documentation with a printer or EasyDirect™ Titration PC Software.

The EasyPlus Titrator is capable of performing titrations determined by:

- pH endpoint titration in juice, wine, p- and m-value
- Acid/base inflection/equivalence point titrations for free fatty acids in food and alkalinity etc..
- Precipitation titrations, such as chloride in food or water and sulfides in oils.
- Redox titrations, such as Vitamin C in beverages, and reducing sugar in wines, sulfite in water, etc..
